

PowerPoint 2016 Workshop

Course objectives:

- Create, edit, print and present PowerPoint shows
- Apply and customise design themes
- Modify slide layouts via the Slide Master
- Insert and manage graphics, shapes, charts, movies and sound
- Insert hyperlinks
- Master animations and transitions

Interface Overview

When you open PowerPoint directly you are presented with a list of recent files or a choice of templates to begin your presentation.

Microsoft has made 16:9 widescreen the default resolution for slides in PowerPoint 2013.

All the new PowerPoint 2013 themes will be designed to scale to both 4:3 and 16:9 formats. If you have a 16:9 slide and show it on a 4:3 projector, black bars will show up on the top and bottom of the slide. Slides made in the old 4:3 format will show black bars on both sides of the slide when they are shown on a widescreen projector or TV.

The File tab provides access to Backstage view.

2. The Ribbon

The tools to create and edit your presentation.

3. The Film Strip

Select or re-order slides.

4. The current slide

Shows the current slide layout, text and objects.

5. Speaker notes

Enables the presenter to add notes to be displayed in Presenter view or on print outs.

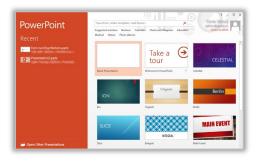

6. Presentation views

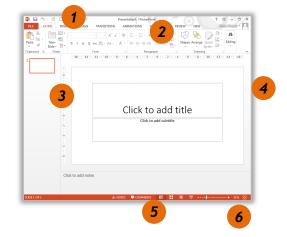

Edit, re-order, or view your slides.

Backstage view

Enter and exit Backstage view

• Click the File tab in the Ribbon.

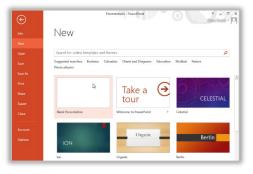

Use Backstage view to:

- Create, open, save, print, view file meta-information, manage MS Powerpoint options and adjust the logged in user account
- If MS Powerpoint is signed in with a Microsoft account you can save directly to OneDrive via your internet connection.

Getting started - Open a blank PowerPoint presentation to start.

Exercise 1.

- 1. Click in the **Title** placeholder:
- 2. Type: "Making a Great Presentation"
- 3. Select the Subtitle placeholder:
- 4. Enter your name

Exercise 2.

You can insert slides of various layouts which are based on the current design theme.

- 1. Click the **New Slide** button on the **Home** tab
- 2. Select Title and Content layout

OR

- Use the CTRL + M keyboard shortcut •
- 3. Type: "Presentation Overview" as the slide title

Add slides from other sources

This exercise uses a slide show downloaded from the UQ Library Ask I.T. website.

1. Click the New Slide button > Reuse Slides...

- 3. Locate and select a PowerPoint presentation
- 4. Click on Open
- 5. Insert slides 3 to 9 by clicking them individually

OR

• Right mouse click > **Insert All Slides** and delete any unwanted slides

You can also use this feature to reuse a presentation theme

6. Click 🔀 to close the Reuse Slides pane

Exercise 3.

Bullet sub points

Indent bulleted text to create sub points

- 1. Select the text to indent
- 2. Click the **Increase List Level** button in the **Paragraph** group on the **Home** tab

Click **Increase List Level** button or press the **TAB** key to indent or demote a bullet point down one level.

Click **Decrease List Level** button or press **SHIFT + TAB** on the keyboard to promote a bullet point out one level.

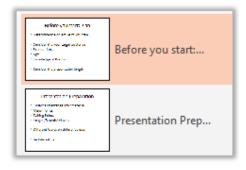

You can reuse slides from Slide Libraries or other PowerPoint files in your open presentation.

Viewing a presentation

Presenter Mode

PowerPoint 2013 has the advantage of offering a presenter view if additional monitors are attached to the PC. This allows the presenter to see speaker notes that won't be visible to the audience. Presenter Mode is only available for full screen Slide Shows

Using an additional output screen

- 1. Click the Slide Show tab
- 2. Check Use Presenter Mode
- 3. Click Monitor menu arrow
- 4. Select Primary Monitor
- 5. Start Slide Show

Overview of Presenter Mode

- 1. Features to adjust presentation
- 2. Slide on main screen and presentation tools (audience view)
- 3. Preview of next slide in presentation
- 4. Speaker notes
- 5. Navigation tools

Exercise 5.

Using the mouse

Click your mouse on screen to progress between slides

On screen tools

Move the mouse to the bottom left side of the screen to display on screen tools

- Click **right arrow** button button to progress
- Click left arrow button (1) to backtrack
- Click all slides button
 to view all slides

Using the keyboard

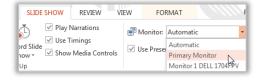

Use the keyboard arrows to navigate through the Slide Show:

- Press the **right** or **down** arrows to move to the next slide
- Press the **left** or **up** arrows to move to the previous slide

Go to a specific slide

- 1. Type the slide number
- 2. Press ENTER

Notes

Navigate during the presentation

Using a touch screen

If you have a touch screen device touch gestures will be valid

Swipe forward Swipe backward Pinch Stretch Tap Double-Tap Advance to the next slide Return to the previous slide Zoom out, see all slides Zoom in Show/hide slide show toolbar Zoom in/out of a slide

Access Slide Show Help

• Type "?" to access a list of shortcut keys to use during shows

Enhancing a presentation

Presentations can be enhanced by applying a theme and by using animations with images and SmartArt in place of ordinary text.

Exercise 8.

Themes style a presentation by specifying a colour scheme, fonts and effects which are complementary. You can completely alter the look of a presentation by changing its theme. Themes can be easily customised.

- 1. Click the **Design** tab
- 2. Select a **theme** from the **Themes** group

Clicking a theme pane applies the theme to all slides.

You can click the **More** 🖾 button for more theme choices.

OR

- 1. Hold CTRL to select specific slides in the filmstrip
- Right click a theme pane > Apply to Selected Slides

Exercise 9.

Customise a theme

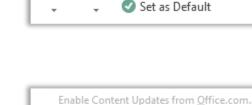

In the **Themes** group on the **Design** tab adjust the theme's:

- Colour scheme
- Fonts (title and content)
- Effects
- Background

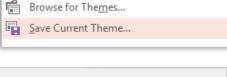

Save a theme

After creating or customising a theme:

- 1. Click the **More** $\boxed{\boxed{}}$ button in the **Themes** group
- 2. Click Save Current Theme...
- 3. Name the theme and click **Save**

Colors Fonts

File name:	customisedPPTTheme.thmx
Save as type:	Office Theme (*.thmx)

Slide Masters

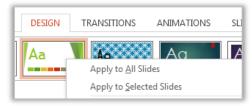

Using slide masters allows you to alter the whole look and feel of a presentation without the need to change each individual slide.

9 of 29

Notes

Apply a built-in design theme

Effects -

🚽 Paragraph Spacing 👻

Exercise 10.

Access the slide master view

- 1. Click the View tab
- 2. Click Slide Master in the Master Views group

Identify masters and layouts in use

Theme slide masters have a set of slide layouts. Hover the mouse over a master or a slide layout for a list of slides on which it is used. If multiple themes are applied there will be a Theme slide master and layouts for each theme.

Exercise 11.

Apply global (theme master) changes

Global changes are applied to the theme's slide master.

Customise the title placeholder

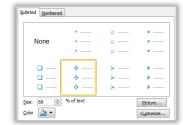

- 1. Select the slide master for your theme
- 2. Highlight the text in the title placeholder
- 3. Select the Drawing Tools: Format tab in the Ribbon
- 4. Adjust the font using the WordArt Styles group

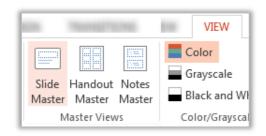

Customise bullets

- 1. Select the bullet level/s to change
- 2. Click Bullets and Numbering
- 3. Select a new bullet
- 4. Click OK

Notes

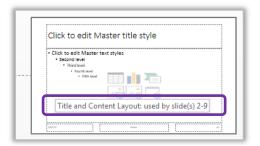

Customise theme slide masters

Accessing the Slide Master

Objects and placeholders

Exercise 12.

UQ Library

Staff and Student I.T. Training

Apply local (theme layout) changes

1. Select the Section Header layout

add an image onto the slide

Local changes are applied to specific theme slide layouts.

2. Move the title and subtitle content placeholders and

Exit Slide Master View and return to your presentation

Click Close Master View on the Slide Master tab

Links can be applied to text or objects. They are not active until the presentation is in slide show mode.

- 3. Click the **Insert** tab > **Hyperlink**

Internal link

- 1. Select Place in this Document as the link location
- 2. Select a particular slide
- 3. Click OK

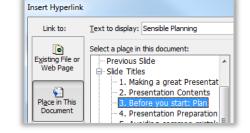

- 1. Go to the Summary slide
- 2. Highlight a bullet point

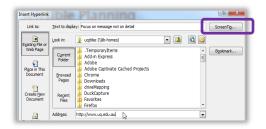

Notes

- 1. Select Existing File or Web page as the link location
- 2. Type or paste the address in the address box e.g. www.uq.edu.au
- 3. Click the ScreenTip...button on the top right

Hyperlinks

- 4. Type "Go to the UQ website"
- 5. Click OK to close the ScreenTip
- 6. Click OK

Set Hyperlink ScreenTip		? ×

Exercise 13.

Insert Online Pictures

Online Pictures

Clip Art in Microsoft Office 2013 is no longer stored on your computer. It is now stored online and is accessed via the Online Pictures button on the Insert tab. When using computers in the Library you may need to sign in to the Internet in order to access these clips.

- 1. Go to the summary slide
- 2. Click the Insert tab > Online Pictures tool

OR

• If you have a slide placeholder with objects on it click **Online Pictures**

The Insert Pictures pane will open to search for images.

- 3. Enter a search term in the Office.com Clip Art search box, e.g. "**Presentations**"
- 4. Click Magnifier search button

6. Click Insert

Use Bing Image Search to search the web for images that are not part of the Office.com content.

Insert image from the Internet

Copy and paste

Exercise 14.

- 1. Open an Internet browser
- 2. Go to images.google.com.au
- 3. Search for "Planning"
- 4. Right click on image
- 5. Select Copy Image

10	of 20	
12	of 29	

Microsoft PowerPoint 2016: Workshop

- 6. Return to PowerPoint
- 7. Go to slide 3
- 8. Right click on slide
- 9. Select Paste

OR

Press CTRL + V

Exercise 15.

- 1. Go to images.google.com.au
- 2. Search for "effective presentations"
- 3. Right click an image
- 4. Select Save Image As...
- 5. Name the file and choose a save location
- 6. Click Save

This method is useful for aggregating your PowerPoint resources in a single folder.

- 7. Go to slide 2
- 8. Click the Insert tab > Pictures
- 9. Locate the image file
- 10. Click Open

Exercise 16.

PowerPoint offers a range of tools to enhance graphics. These tools are contextual and are therefore only available when the image is selected.

Apply an image style

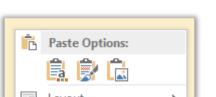

- 1. Go to slide 1
- 2. Select the image
- 3. Click the Picture Tools: Format tab
- 4. Hover mouse over Picture Styles group

A preview will appear on the image

5. Click a pane to apply that image style

Notes	

Insert image from a file

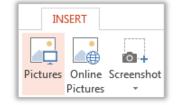

Image editing

Customise the image style

Adjust the picture **border** and **effects** options to customise the image style

Exercise 17.

Add shapes

- 1. Go to slide 4
- 2. Click the **Insert** tab > **Shapes**
- 3. Select a shape
- 4. Click the mouse to insert a shape of default size

OR

• Click and drag a custom shape

Edit shapes

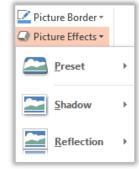

- 1. Select the shape
- 2. Click the **Drawing Tools: Format** tab which will appear in the Ribbon

Use the Shape Styles group to:

• Change the fill, outline and effects of the shape

Use the Word Art Styles group to:

• Style the fill, outline and effects of the shape text

Shapes SmartArt

14 of 29

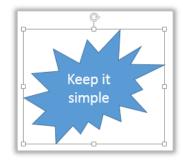

Add text to shapes

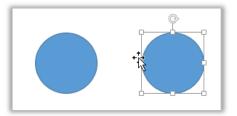

- 1. Select the shape
- 2. Type "Keep it simple!"
- 3. Resize the shape to fit the text

Diagrams/Connected Shapes

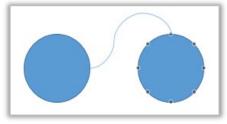

- 1. Go to Slide 4
- 2. Select a shape
- 3. Press CTRL + D to duplicate
- 4. Drag shapes side by side
- 5. Go to the Insert tab
- 6. Click Shapes button
- 7. Select Curved Connector
- 8. Hover over shape so that black handles appear
- 9. Click on a handle and **drag** mouse to the other shape
- 10. **Drop** the connector over another black handle to connect the shapes

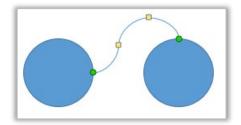

The dots will become green if the shapes are successfully connected

Exercise 18.

SmartArt graphics are pre-made diagrams consisting of shapes in a meaningful formation.

- 1. Go to slide 7
- 2. Click Layout > Comparison from the Slides group on the Home tab

- 3. Click the SmartArt button in the new placeholder
- 4. Select a SmartArt category
- 5. Click a layout
- 6. Click OK

Add text

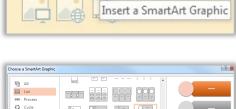

Notes

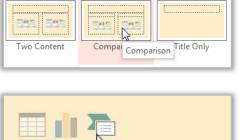

- 1. Open the text pane by clicking the **Arrow** tab on the left of the SmartArt graphic
- 2. Type at SmartArt bullet points:
- Practice
- Preparation
- Success

The SmartArt displays the text entered at bullet points. Click outside SmartArt to view.

Insert external data table

- 1. Insert a New Slide
- 2. Click the Layout button > Title Only
- 3. Enter Title "Chart Data"
- 4. Open the Excel file "Books Borrowed" and copy the data table (Cells A2:D7)
- 5. Return to PowerPoint
- 6. Click on **Paste** drop down arrow > **Paste Special** on the Home tab
- Select the Paste Link option
- 8. Select Microsoft Excel Worksheet Object
- 9. Click OK

This can be resized accurately and can be edited directly in Excel.

Modify Chart Data Table

- 1. Double click on the table to open the original Excel file
- 2. Change the data as required
- 3. Save and close Excel

Animating a presentation

Animation is a tool to add interest to a presentation by making objects appear, disappear, change or move as part of the flow of the presentation.

Exercise 20.

Open the Animation Pane

- 1. Go the Animations tab in the Ribbon
- 2. Click the Animation Pane button in the Advanced Animation group

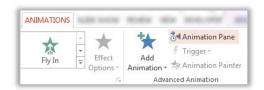

The Animation Pane will open on the right of screen.

	osoft Excel Worksheet t1/R1C1:R8C5	
 Paste Paste link 	As: INtronoff: Eacel Worksheet Object Attach Hyperlink	Display as icor
Result	Inserts a picture of the clipboard contents into your presentation. Paste Link creates a shortcut to the source file so	
H >HI	that changes to the source file will be reflected in your presentation.

Transitions

Transitions are animations which occur between slides. Office 2013 has 3D type transitions which will not be compatible with previous versions of PowerPoint.

Exercise 22.

- 1. Click the **Transitions** tab in the Ribbon
- 2. Click **More** button on the **Transition to This Slide** group
- 3. Select a transition pane to apply it to the current slide

Slides with animations or a transition have a star icon beside them in the filmstrip.

4. Click Apply To All in the Timing group

This will apply the current transition with any customisations to all slides.

Transition customisation

The **Timing** group also controls:

- Transition sound effects
- The duration of the transition
- Presentation automation using timings

Media options

Using Media and sound can be engaging or not perform as hoped. Ensure your venue has appropriate facilities and that you have checked your presentation before presenting.

Exercise 23.

Video clips can be AVI, MPEG, MOV etc. The new default format for video is H.264 rather than the previous .wmv

You can generally choose to link to the original movie or embed the file

- Embedding means the PowerPoint file will be larger but the movie will always be available.
- Linking to files online means that the PowerPoint file is smaller but you need to have a reliable internet connection for access and replay.

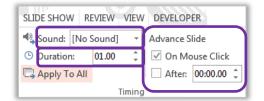

Notes

Internet Video e.g. YouTube movie

There are currently compatibility issues embedding a video into a PowerPoint presentation and the resolution involves creating a hyperlink to the video clip. This will not run inside the presentation but will go to YouTube in the default browser. You will need a reliable Internet connection to ensure the Internet video will run within a presentation without undue delay.

- 1. Switch to Youtube and find a video clip
- 2. Copy video URL
- 3. Switch to PowerPoint
- 4. Go to slide 2
- 5. Select image
- 6. Click on **Hyperlink** in **Links** group on **Insert** tab
- 7. Paste video URL
- 8. Click ScreenTip button

9. Type YouTube Clip

- 10. Click **OK**
- 11. Click **OK** again

The link will not work in normal view. Start Slide Show view to make links active. The Video will open in a browser window.

Exercise 24.

Set Hyperlink ScreenTip	
Screen <u>T</u> ip text:	
YouTube Clip	
	ОК

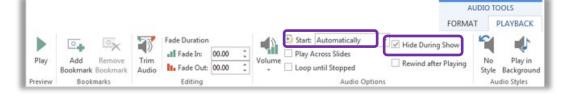

Insert an audio clip

An audio clip icon sepresents any audio files you include. The new default format for audio is AAC rather than the previous .wma. Audio can start automatically, on click or as part of an animated sequence.

Audio can be linked or embedded:

- Embedded files inflate the size of the PowerPoint file
- Linked files must put into a folder structure which accompanies the presentation
 - 1. Go to slide 1
 - 2. Click on Insert tab
 - 3. Click on Audio button
 - 4. Select Audio on My PC... option
 - 5. Select Charge.wav

- INSERT DESIGN 0. tures Online Screenshot Video Audio Pictures Images Me 🥠 Online Audio.. 7 - - 8 Audio on My PC... Record Audio.
- 6. Click the Audio Tools: Playback tab
- 7. Click Hide During Show

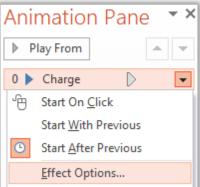

Play audio over several slides

- 1. With the audio selected:
- 2. Click on the Animations tab
- 3. Click on Animation Pane button

5. Click on Effect Options...

Play /	Audio

	On click				
	🔵 Aft	er <u>c</u> urrent slide			
() A <u>f</u> t	er: 🖪 🚔 slides			

6. Stop playing after **3 slides** There is a maximum of 999 slides.

7. Click OK

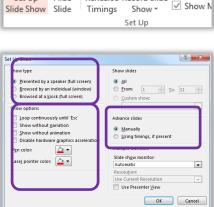

Presentation output

The default PowerPoint settings assume that someone will deliver the show manually. To make a stand alone or cycling presentation: alter the output settings.

Exercise 25.	Change screen output
	SLIDE SHOW
 Click the Slide Show tab > Set up Slide Show 	Set Up Hide Rehearse Record Slide ✓ Vise Tin

- 2. Adjust settings like:
- Show Type
- Show Options
- Advance Slides
- 3. Click OK

Notes

THE UNIVERSITY OF QUEENSLAND

Send slides to Word

Exercise 26.

Slides can be sent directly to Word 2013 for editing and for handout preparation.

 Select the File tab > Export 	FILE Export
2. Click Create Handouts	Create Handouts
3. Click the Create Handouts button.	Create Handouts
	Send to Microsoft Word
 Select a layout "Blank lines next to slides" Click OK Microsoft Word will open with the slides presented in a table 	 Notes <u>n</u>ext to slides Blank lines next to slides Notes <u>b</u>elow slides Add slides to Microsoft Word document Paste Data link
	OK Cancel

Exercise 27.

Select print output

Printing generally provides a black and white slide by default. If you want to include the background in your presentation, select the colour option from your print preview.

1. Click the **File** tab > **Print**

File	Home	Insert
Print		

- 2. Select which slides to print
- 3. In Print Layout select Handouts: 3 Slides
- 4. Indicate the number of copies
- 5. Click Print button

Exercise 28. Package your presentation

Publishing to present at another venue requires being able to utilise all the functionality of your slideshow, its linked files and effects. The presentation will be reliable if all associated files are combined as a package.

- 1. Click on the File tab
- 2. Click Export

3. Click Package Presentation for CD

This will ensure all essential files are included with the presentation.

- Export

 Package Presentation for CD

 This package includes:
- Linked or embedded items
- Any other files added to the package

? ×

You can copy the presentation to a CD or to another available folder/directory or USB key.

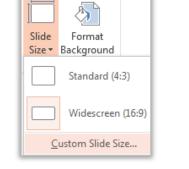

- 1. Click Options...
- 2. Check Linked Files
- 3. Check Embedded TrueType fonts
- 4. Check Inspect presentations for inappropriate or private information
- 5. Click on OK
- 6. Click on Copy to folder
- 7. Enter a Folder name
- 8. Specify a location
- 9. Click on OK

Posters in PowerPoint

To use PowerPoint for a poster you need to adjust your slide setup.

Exercise 29.

- 1. Click the Design Tab > Slide Size
- 2. Select Custom Slide Size...

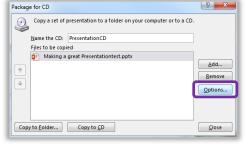

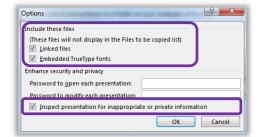

Posters Page setup

- 3. Change the Slide Size to A3 Paper
- 4. Change the Slide Orientation to Portrait
- 5. Click OK
