Research Week

Library seminars and workshops for Early Career Researchers

The University of Queensland Library is celebrating Research Week 2017 with a series of workshops and presentations showcasing the tools, resources, and skills development available at The University of Queensland.

Many sessions are targeted to Early Career Researchers (ECRs) and Higher Degree by Research (HDR) students, but all researchers are welcome. Unless otherwise noted, please book in to these sessions via the link provided.

St Lucia campus

	Monday, 11 September 2017
12pm-1pm Room D501 Centre for Digital Scholarship Level 5, Duhig Tower (#2)	**Text mining & text analysis for research** Do you know what text mining and text analysis are? How do you get text for analysis—just download everything from JSTOR? Are wondering if you should be using NVivo or Leximancer? Come along for an introduction to text mining and text analysis and the new Library Guide that has all the answers. Register for this session on StudentHub
1pm-2pm Room D501 Centre for Digital Scholarship Level 5, Duhig Tower (#2)	**Mining the Manuscript: digital humanities using Fryer manuscript collections** The manuscript collections in Fryer Library are a digital humanities resource waiting to be tapped. Hear how one student project is applying data mining techniques to Fryer's collections of manuscript correspondence from asylum seekers in offshore detention centres, and talk to librarians about using Fryer collections in your research. Register for this session on StudentHub

	Tuesday, 12 September 2017
12pm-1pm Room D501 Centre for Digital Scholarship Level 5, Duhig Tower (#2)	**Overview of Australian Open-data sources** This session will briefly introduce you to the open source data portals Queensland Globe, the National Map, AURIN and TERN. These resources provide a variety of data that can be mined, manipulated and exported to support your research. Register for this session on StudentHub
12pm-2pm Room S201 Hawken Engineering Building (#50)	**Taylor & Francis Presents How to be an effective reviewer: Peer reviewing for academic journals** Presented by Taylor and Francis, this workshop will cover: • What is peer review and what are its aims and benefits • Types of peer review and why you should consider being a reviewer • Recent innovations in peer review globally • A quick overview of the common online systems • Ethics in peer review • Hints and tips on getting your review right (including a short practical exercise) Register for this session on StudentHub
1pm-2pm Room D501 Centre for Digital Scholarship Level 5, Duhig Tower (#2)	**Mapping the thematic and spatial content of news texts using Knime and ArcGIS** Knime is an open-source data analytics tool that can perform a wide range of data mining tasks via a graphical interface. This workshop will demonstrated how Knime can be used to extract topics and place names from a large collection of news articles and will also show how the associations between topics and places can be visualised using ArcGIS. Register for this session on StudentHub

St Lucia campus, continued

11am-12pm Room D501 Centre for Digital Scholarship Level 5, Duhig Tower (#2)	**Sharing sensitive research data** Do you collect sensitive research data ranging from human participants, cultural practices, ecology or threatened species? Sharing your research data is still an option, and the advantages of sharing the sensitive data will outweigh any potential disadvantages when simple and appropriate steps are taken. This workshop will look at what sensitive data is, how to manage sensitive data through the entire research project and what are the techniques you can use to safely share sensitive data. Register for this session on StudentHub
12pm-1pm Room D501 Centre for Digital Scholarship Level 5, Duhig Tower (#2)	**Collaborative/Sharing research platforms best practices** Discussion about best practices for UQ researchers in using the increasing number of web-based platforms to increase their visibility through collaboration and promotion of their work. This session will specifically look at ResearchGate, Figshare and others Register for this session on StudentHub
1pm-2pm Room D501 Centre for Digital Scholarship Level 5, Duhig Tower (#2)	**Writing Award-Winning Reviews with Professor Neal Ashkanasy** For all who are interested in shaping research and understanding intricacies of peer review process, this session is for you. Topics discussed will include: • Getting started and qualifications • Contents of a review • Reviewing revisions Register for this session on StudentHub
3pm-4pm Room D501 Centre for Digital Scholarship Level 5, Duhig Tower (#2)	**Peer Reviewer training with Publons Academy** This session will cover: • What peer review is and why it is important • How peer review can make you a better researcher • What peer review can do for your career • An introduction to Publons Academy • Discussion and Q&A session (short peer review exercise) Register for this session on StudentHub

12pm-12.30pm Room D501 Centre for Digital Scholarship Level 5, Duhig Tower (#2)	**UQ's Research Data Manager Pilot: An overview and system demonstration drop-in** Over the past 12 months UQ has been building the UQ Research Data Manager system, which has been driven by the Office of the Deputy Vice-Chancellor (Research). The system provides UQ researchers and Higher Degree Research (HDR) students with a free storage facility to practice good stewardship of research data. It also allows for effective curation at all stages of the data lifecycle. Drop-in to this session to learn more about the project and the system that is currently in development.
12.30pm-1pm Room D501 Centre for Digital Scholarship Level 5, Duhig Tower (#2)	**iThenticate** iThenticate is a professional plagiarism prevention software for HDR students and researchers. Accidental plagiarism is common and can affect research at submission. Publishers, government departments and funding bodies are using this software to detect these instances. This session will discuss why this software is essential for HDR students and researchers prior to submission. Register for this session on StudentHub
1pm-2pm Room D501 Centre for Digital Scholarship Level 5, Duhig Tower (#2)	**Funding databases** Need money for your research? This workshop will give you hands on guidance to find funding opportunities using the Research Professional, Grantsearch Australia and SPIN databases. You will be shown how to set up your own profiles so funding opportunities in your field will be sent to you. Register for this session on StudentHub

12pm-1pm Room D501 Centre for Digital Scholarship Level 5, Duhig Tower (#2)	**Researcher identifiers** Researcher identifiers, such as an ORCID ID, allow you to reliably and unambiguously connect your names(s) with your professional activities throughout your career, including your scholarly papers, data, awarded grants, affiliation and biographical information. Come along to get an overview of how best to setup your ORCID Profile to maximise its impact and prestige for you and your work. Register for this session on StudentHub
1pm-2pm Room D501 Centre for Digital Scholarship Level 5, Duhig Tower (#2)	**Turning any object into a 3D model** This information session will cover the different ways that anyone can create a 3D model (photogrammetry, 3D scanning, CAD & 3D modelling, MRI conversion) and will include demonstrations of photogrammetry, 3D scanning, editing a 3D model, and presenting the model. Register for this session on StudentHub

Research Week Library Bites at Dorothy Hill Engineering and Sciences Library

Room L217, Level 2, Hawken Engineering Building (#50), UQ St Lucia campus

Monday 11 Sep 12pm-12.30pm	**Library Services for ECRs in Science and EAIT drop-in** Are you aware of the Library Services that are available to you as an ECR? Come along to hear about the services that the Library can assist you with, meet your Librarian for your area and ask questions about discover how we can assist you.
Tuesday 12 Sep 12pm-12.30pm	**iThenticate drop-in** iThenticate is a professional plagiarism prevention software for HDR students and researchers. Accidental plagiarism is common and can affect research at submission. This session will discuss why this software is essential for HDRs and researchers prior to submission.
Wednesday 13 Sep 12pm-12.30pm	**ORCID ids drop-in** This session will discuss why ORCiD is essential for researchers and demonstrate how to add publications and link their ORCiD to UQ eSpace.
Thursday 14 Sep 12pm-12.30pm	**EndNote Q&A drop-in** Have you attended an Endnote training session but still have questions? Come along to this Endnote Drop in session and let us assist you.
Friday 15 Sep 12pm-12.30pm	**ABS Census Data drop-in** Do you need to find statistics about the Australian population and not sure where or how to access the data? Do you want to be able to compare data from various census? Do you want to access ABS access Confidential Unit Record Files? Come along to find out how.

Research Week at Herston Health Sciences Library

Training Room 0910-621, Herston Health Sciences Library, Block 6, Level 6, Royal Brisbane & Women's Hospital

Tuesday 12 Sep 12pm-1pm 1pm-2pm (repeat)	**How social are your papers? Drop-in** Discover and measure the online attention and engagement that your scholarly papers are receiving with alternative metrics or "altmetrics". This workshop will show you how to uncover the online conversations about your work from social media, blogs, news outlets and policies.
Wednesday 13 Sep 10am-11am	**Systematic review searching skills (Health Sciences)** Curious about systematic reviews? This workshop is a short overview of systematic reviews with a focus on the initial stages of developing a review using examples from the health sciences. This workshop covers question development, database selection, searching, and working with results. Register for this session on StudentHub
Thursday 14 Sep 10am-11am	**Find me the money** Need money for your research? This workshop will give you hands on guidance to find funding opportunities using the Research Professional, Grantsearch Australia and SPIN databases. You will be shown how to set up your own profiles so funding opportunities in your field will be sent to you. Register for this session on StudentHub

Research Week at Gatton Library

Training Room 1, Level 1, Gatton Library, UQ Gatton campus

Monday 11 Sep 12pm-12.30pm	**Library Services for ECRs in SAFS, Vet Science and QAAFI drop-in** Are you aware of the Library Services that are available to you as an ECR? Come along to hear about the services that the Library can assist you with, meet your Librarian for your area and ask questions about discover how we can assist you.
Tuesday 12 Sep 12pm-12.30pm	**ABS Census Data drop-in** Do you need to find statistics about the Australian population and not sure where or how to access the data? Do you want to be able to compare data from various census? Do you want to access ABS access Confidential Unit Record Files? Come along to find out how.
12.30pm-1pm	**iThenticate drop-in** iThenticate is a professional plagiarism prevention software for HDR students and researchers. Accidental plagiarism is common and can affect research at submission. This session will discuss why this software is essential for HDR students and researchers prior to submission.
Wednesday 13 Sep 12pm-12.30pm	**ORCID ids drop-in** This session will discuss why ORCiD is essential for researchers and demonstrate how to add publications and link their ORCiD to UQ eSpace.
Thursday 14 Sep 12pm-12.30pm	**EndNote Q&A drop-in** Have you attended an Endnote training session but still have questions? Come along to this Endnote Drop in session and let us assist you.
