S0154	Senior Public Examination Results Registers	Series	3 m	The Senior Public Examinations results registers are held by the University of Queensland Archives. The University of Queensland was the authorised examiner for the final year of secondary school and university matriculation examinations from 1911 until 1972. Generally, the Senior Public Examination results registers have two sections, the major November exams and the supplementary exams held the following year, in January, February or March. At the front of each register, there is an index that reflects the arrangement within the register. Schools are listed in alphabetical order within each centre, followed by miscellaneous entries (academies, convents and prisons plus late and private entries) for that centre; International entries can be found at the end of the country centres. November examination results are recorded separately for the Brisbane Centre and then for Country Centres. From 1963, the Brisbane and country results are split into separate volumes and the pagination carries over from Brisbane Centres volume to the Country volume. Students are normally listed in alphabetical order within their school. From 1940's until mid-1960's boys names and results appear first. For supplementary examinations, results are recorded by centre and from 1962/63 until 1966/67 results appear in a separate volume with adult matriculations results. The adult matriculation results are normally found at the end of each examination centre.	November 1910-1972
