

Checklist for ethical AI use

This checklist highlights the importance of engaging ethically and responsibly with AI in learning.

Trust, ethics, and integrity

- Do you know where the AI-generated information is coming from?
- Have you verified the accuracy of AI outputs against trusted sources?
- Are you [acknowledging and referencing AI](#) contributions in your work to maintain academic integrity?
- Have you considered whether the AI respects Indigenous data sovereignty and cultural considerations?
- Are you inputting information that isn't yours to share? For example, Indigenous data, [personal information](#), sensitive information, [copyright or licensed works](#).

Human-centred and equitable learning

- Are you using AI to complement collaboration and creativity, not replace them?
- Are you mindful of how over-reliance on AI might affect interpersonal connections in your studies?

Responsible use and future preparedness

- Are you using AI as a tool to enhance your learning, not as a shortcut?
- Are you building your skills and critical thinking alongside AI use?
- Are you thinking about the ways future workplaces will value thoughtful integration of technology, including AI use?

By reflecting on these questions, you can use AI responsibly while staying aligned with UQ's values and your personal learning goals.

Check the [AI Student Hub](#) for more information about using AI at The University of Queensland.
